DETAILED ACTION

Claims 26-51 are pending in the instant application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 26-38 and 51, drawn to a method of treating amyotrophic lateral sclerosis by gene therapy, classified in class 514, subclass 44.
- II. Claims 39-50, drawn to a pharmaceutical composition comprising an expression system for two neurotrophic factors, classified in class 435, subclass 320.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are patentably distinct because although the composition of Group II can be used to practice the method of the invention of Group I, the composition is not limited to this use and can be used to produce a recombinant host cell. Thus, the composition of the invention of Group II is patentably distinct from the method of the invention of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter and because the searches required for the separate inventions are not coextensive, restriction for examination purposes as indicated is proper.

Art Unit: 1632

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
